

November 7, 2014

To The Moorlands Residents in the 7400 Blocks:

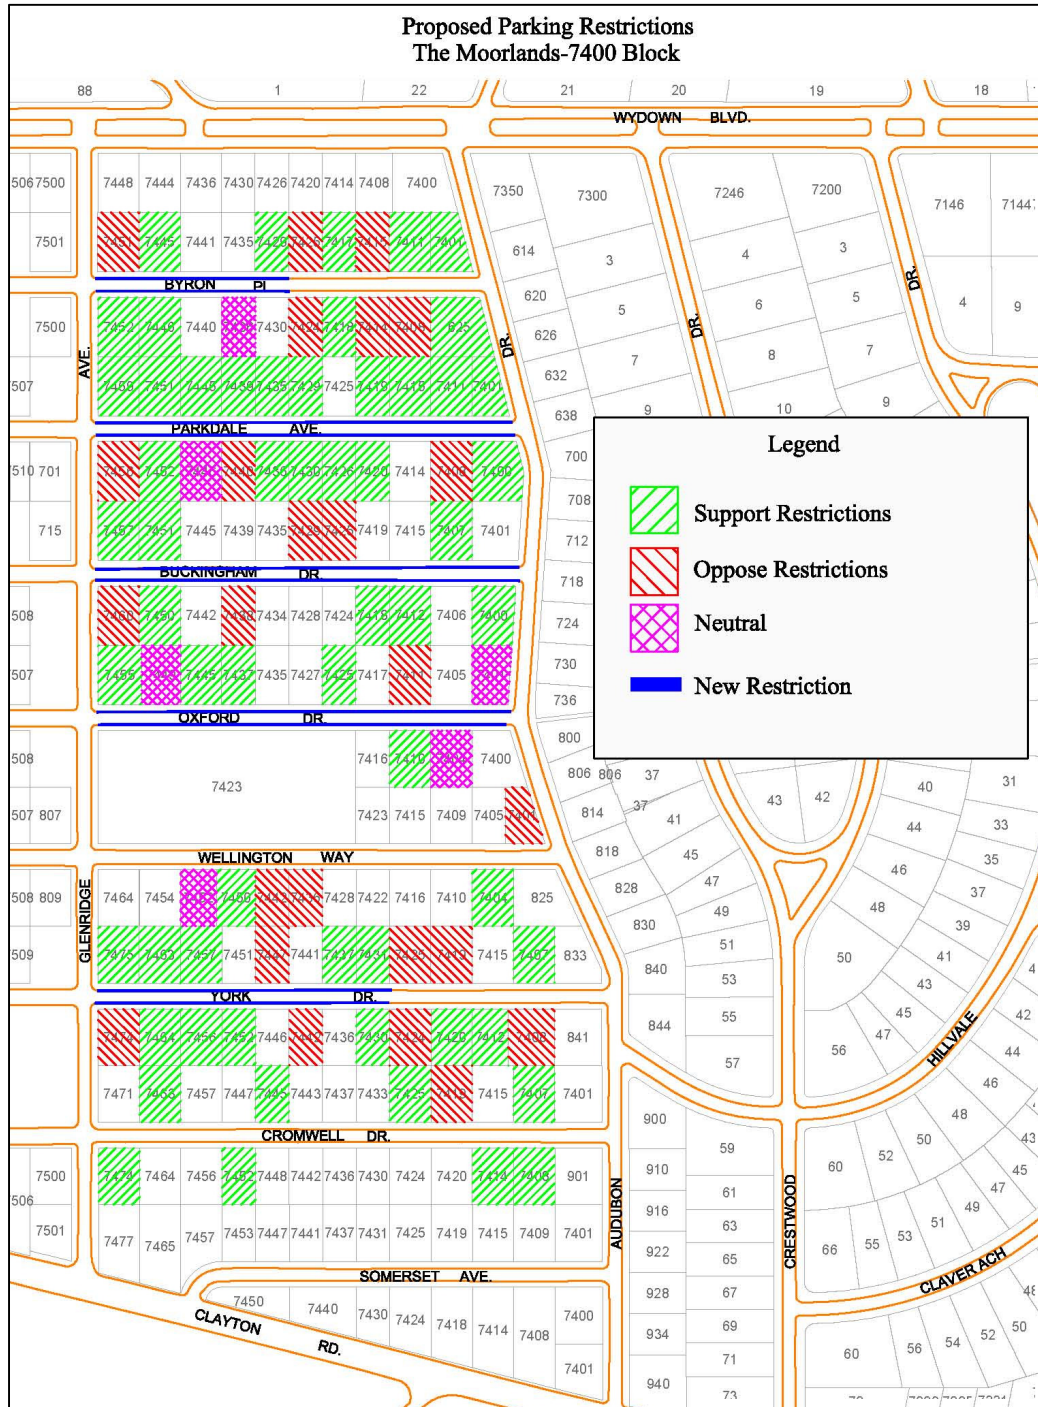

The Public Works Department mailed a survey dated July 7, 2014 to determine if the residents in the 7400 blocks of the Moorlands Subdivision desired tighter restrictions over non-residential parking in your neighborhood. The responses to whether a ninety-day trial permit parking regulation should be considered were as follows:

Results by Street	Favor Adoption	Oppose Adoption	No Opinion	No Response
Buckingham	8	4	1	11
Byron	8	6	0	5
Cromwell	8	1	0	16
Oxford	5	1	3	7
Parkdale	16	3	1	2
Wellington Way	2	3	1	10
York	12	7	0	5

Total Responses:	90	out of	146	62%
-------------------------	-----------	---------------	------------	------------

Based on these results, the map below indicates the limits of the on-street parking restrictions that will be implemented on a ninety-day trial basis. At the end the ninety-day trial period, input from residents will be solicited and any desired modifications to the limits of the on-street parking restriction will be considered at that time.

On-street parking is to be restricted as follows: residential parking only from 10pm – 6am. Clayton residents may obtain their “Blue” parking zone stickers and hang tags from the Traffic Violations Bureau (aka TVB) Customer Service Desk at 10 S Brentwood Blvd, Mon–Fri, 8am–5pm. Stickers are limited to the number of vehicles owned by each resident or residential family. You will need to bring a completed copy of the enclosed application and provide proof of residency. Either your driver’s license or utility bill with your Clayton address on it will provide proof of residency. Also, you have to provide the year, make, model and the license plate number of each vehicle that requires a sticker. Up to five visitor hang tags may also be obtained per housing unit for use by visitors, guests (both short-term and overnight), domestics and service people. Please direct any questions regarding stickers and hang tags to the City of Clayton TVB at 290-8441.

The Public Works Department will begin the trial permit parking regulation by erecting parking signage during the month of December. Police enforcement will initially begin with a communication campaign after the installation of the signage to familiarize users of on-street parking with the new regulations. During this time warning tickets will be issued. Violations will be issued starting the week after the communication campaign which will begin the trial period. During the trial period, the City and the residents can closely monitor the permit parking experiment.

The City will then survey the residents again after April 1, 2015 to determine if the on-street parking restriction should be formally enacted. If the majority of residents and property owners find the parking restriction to be acceptable, the City will make the change permanent.

Respectfully,

John E. Wulf, P.E.
Assistant Director of Public Works
